Over 2.5 goals: V4 report

Fri 30 Oct 2026 to Sun 01 Nov 2026 (english). All times UK.

Executive summary

125 fixtures analysed: High 9, Medium 38, Weak 6, rejected 72. Selected fixtures with both attacks scoring 2+ in 3 of 5 or better: 14.

Selection engine: the validated model (V4 lock, unchanged since 19 Oct 2026). Out of sample it hit 69% in High (729 fixtures), 64% across all selected (2,518), 54% rejected (5,017). Those are band rates, not the chance of any one fixture. Scored 2+ and Let in 2+ counts are shown on every card as supporting evidence; both attacks at 3 of 5+ adds about three points inside the bands and is highlighted, not required.

Data coverage and limitations

• Fixtures analysed: 125. Every count is taken from the stored final score of each match (fixture ID, teams, score); the five scorelines are printed on each card.

• Form sample: each side's last five completed league games this season, cup ties excluded; venue rows use the last five league games at that venue, sample size shown when fewer.

• Not covered by API Sports for 2026-27: Northern Premier, Isthmian and Southern League Division One. 'England V2' is not an API Sports competition and was not included.

• Scored first / conceded after leading: needs match event timelines, not pulled (one call per match, no history). Not shown. First-half goals: available from half-time scores, not yet on the card.

• Injuries and suspensions: the API returned lists for a minority of fixtures this week; nothing is inferred where it returned none. Squad rotation in cup ties is not assessed.

• Opposition strength: each side's opponents' scoring versus the division is held in the analysis file (oq columns) but is not part of the alignment score.

• Competitions in scope with no fixtures in the window: EFL Cup, FA Cup, EFL Trophy, FA Trophy.

Methodology (V4 lock)

• Selection: gradient-boosted model on each side's last-5 league counts (goals, 3+, 2+ scored, 2+ conceded, clean sheets, failed to score, BTTS), last-3 venue counts and the division's 3+ share. Trained on 2023-24 and 2024-25, validated on 2025-26; cut points from validation deciles. High = top decile; Medium = next two; Weak = bottom quarter of Medium; rejected below.

• Out of sample (Jan to Jun 2026 and Aug to Oct 2026, 7,535 fixtures): High 69% (729), Selected 64% (2,518), rejected 54% (5,017). Band rates, not per-fixture probabilities.

• Scored 2+ and Let in 2+ are shown for both sides as evidence. Both attacks 3 of 5+ is highlighted (Selected with it 66%, High 71%) but never required: High fixtures failing a 2-of-5 attacking rule hit 73% on 222 fixtures.

• BTTS: YES when the pattern is 'both teams contribute' (two scoring routes, each side scoring in 4 of 5 and conceding in 3 of 5); likelihood from a second validated model (High 61%, Medium 55%, Low 50%). A lean, not a pick.

• V2 and V3 alignment scores were tested (62 to 66% at comparable sizes) and are not used for selection. Full tables in over25_backtest_baseline.md.

• No averages anywhere. Nothing inferred for missing data. Every count comes from stored final scores; the five scorelines are printed on each card.
