Over 2.5 goals: V4 report

Mon 09 Nov 2026 to Fri 13 Nov 2026 (european). All times UK.

Executive summary

14 fixtures analysed: High 0, Medium 0, Weak 0, rejected 14. Selected fixtures with both attacks scoring 2+ in 3 of 5 or better: 0.

Selection engine: the validated model (V4 lock; V4.1 changes in config/model_config.json). Benchmark, season 2026-27 to 2026-11-08 (1824 finished fixtures, Rob's 14 leagues, clean out of sample): 3+ goals in High 84 of 119, Medium 145 of 235, trump card 3 of 4, rejected 812 of 1466. Band counts, not the chance of any one fixture. Scored 2+ and Let in 2+ counts are shown on every card as supporting evidence; both attacks at 3 of 5+ adds about three points inside the bands and is highlighted, not required.

Data coverage and limitations

• Fixtures analysed: 14. Every count is taken from the stored final score of each match (fixture ID, teams, score); the five scorelines are printed on each card.

• Form sample: each side's last five completed league games this season, cup ties excluded; venue rows use the last five league games at that venue, sample size shown when fewer.

• Not covered by API Sports for 2026-27: Northern Premier, Isthmian and Southern League Division One. 'England V2' is not an API Sports competition and was not included.

• Scored first / conceded after leading: needs match event timelines, not pulled (one call per match, no history). Not shown. First-half goals: available from half-time scores, not yet on the card.

• Injuries and suspensions: the API returned lists for a minority of fixtures this week; nothing is inferred where it returned none. Squad rotation in cup ties is not assessed.

• Opposition strength: each side's opponents' scoring versus the division is held in the analysis file (oq columns) but is not part of the alignment score.

• Competitions in scope with no fixtures in the window: Bundesliga, Eredivisie, Ligue 1, Super Lig, Scottish Premiership, La Liga, Primeira Liga, Scottish Cup, Scottish League Cup, Champions League, Europa League, Conference League, DFB Pokal, KNVB Beker, Turkish Cup, Taca de Portugal.

Methodology (V4 lock)

• Selection: gradient-boosted model on each side's last-5 league counts (goals, 3+, 2+ scored, 2+ conceded, clean sheets, failed to score, BTTS), last-3 venue counts and the division's 3+ share. Trained on 2023-24 and 2024-25, validated on 2025-26; cut points from validation deciles. High = top decile; Medium = next two; Weak = bottom quarter of Medium; rejected below.

• Benchmark, season 2026-27 to 2026-11-08 (1824 finished fixtures, Rob's 14 leagues, clean out of sample): 3+ goals in High 84 of 119, Medium 145 of 235, trump card 3 of 4, rejected 812 of 1466. Band counts, not the chance of any one fixture.

• Cup competitions (European and domestic cups), measured separately, season 2026-27 (1606 finished ties): 3+ goals in High 31 of 47, Medium 119 of 197, trump card 2 of 3, rejected 794 of 1359. Cup ties are outside the 14-league benchmark; treat cup selections with that in mind.

• Scored 2+ and Let in 2+ are shown for both sides as evidence. Both attacks 3 of 5+ is highlighted (Selected with it 66%, High 71%) but never required: High fixtures failing a 2-of-5 attacking rule hit 73% on 222 fixtures.

• BTTS (V4.1): YES when the BTTS model is in its High band or the fixture is a trump card; lean YES for the Medium band; no lean for the Low band. BTTS model bands, same fixtures: High 118 of 183, Medium 805 of 1440, Low 121 of 201 had both teams score. A lean, not a pick, and never a veto on Over 2.5.

• V2 and V3 alignment scores were tested (62 to 66% at comparable sizes) and are not used for selection. Full tables in docs/backtest_baseline.md.

• No averages anywhere. Nothing inferred for missing data. Every count comes from stored final scores; the five scorelines are printed on each card.
